

COLLATERAL RISK MANAGEMENT SYSTEM

Delivering – Success Through Partnership

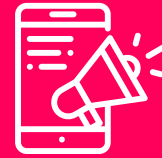

CLIENT

- A Real Estate sector Business Intelligence company from Gurgaon, India engaged in providing services by tracking realty trends and facilitating Banks & FIs with decision support system to record & track ongoing realty projects and deliver relevant MIS reports online.

BENEFIT

- Subscription based on-cloud solution offering.
- One app tracking & reporting.
- Mobility solution.
- Robust reporting system catering to the market needs.

REQUIREMENT

- To provide a unified on-cloud “CRMS Platform”, specializing in Project Approvals and Project Monitoring services.
- To develop Project Rating models & Realty market Intelligence reports.

SOLUTION

- Developed CRMS app on Force.com platform for back office team to record & track Realty project execution.
- Configured & customized SFDC Customer Portal to provide Realty project details to subscribed customers.
- Developed multiple custom Reports covering various life cycle of the Realty project.
- Integrated Google charts for graphical reporting & with Google maps to depict project address location.
- Integrated with Amazon Web Services (AWS) for Realty project reports & project image storage.
- Developed Data load scripts & UI console to load and manage project related data into the CRMS system.
